Test Summary Report

STR

"Worker" Website
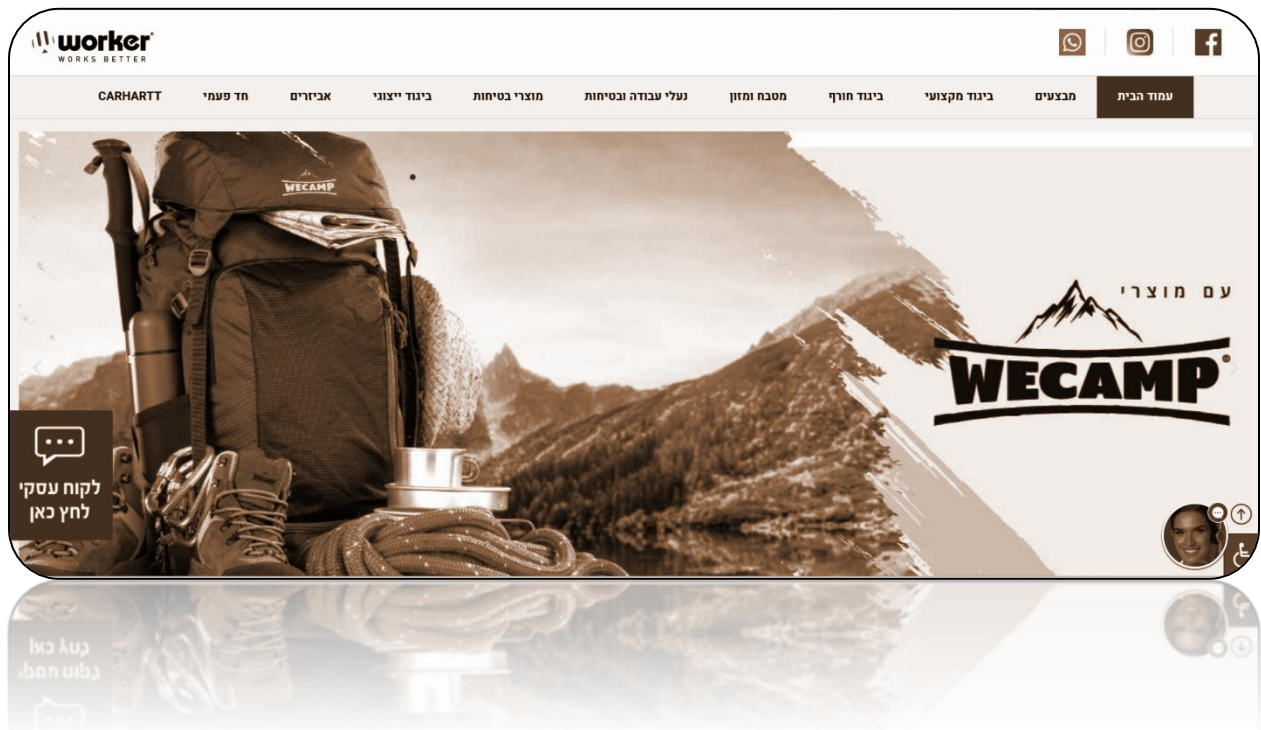

Prepared By Alex Schwarz

Content

1. Purpose

This document presents findings referring to the tests done on the website of the "Worker" Company. Worker is the largest and leading company in Israel in the production, import and marketing of personal protective equipment, safety shoes, professional clothing, representative clothing and road safety products.

The tests were carried out on the main functions of the site, which include operations such as navigation and displaying the menu, graphic design, proper functioning of placing an order, registering on the site, reading information, working of the accessibility menu, and using various features.

2. Application Overview

The Worker Safety Equipment Website is the largest and leading online platform in Israel for the production, import, and marketing of personal protective equipment, safety shoes, professional clothing, representative clothing, and road safety products. The application aims to provide a convenient and comprehensive platform for individuals, businesses, and organizations to access high-quality safety equipment and apparel.

1. Product Catalog: The website offers an extensive catalog of personal protective equipment, safety shoes, professional clothing, representative clothing, and road safety products. Products are categorized and organized, making it easy for users to navigate and find the items they need.

2. Online Ordering and Purchasing: The application enables users to place orders online, add products to a shopping cart, and proceed to a secure checkout process. Multiple payment options, such as credit cards and online payment gateways, are available to ensure a smooth transaction.

3. Account Management: Users can create accounts on the website, allowing them to save their preferences, manage their orders, and track shipments. The account dashboard provides a centralized hub for users to review their purchase history and update their personal information.
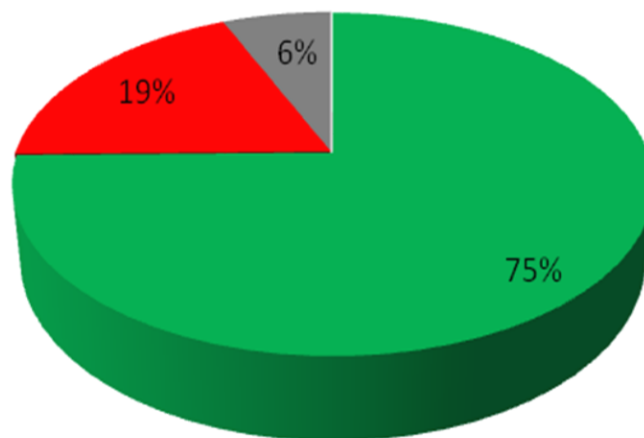

4. Customer Support: The website offers customer support channels, including live chat, email, or phone assistance. Users can reach out to the customer support team for inquiries, product recommendations, or assistance with their orders.

4.Recommendations

1. Improve Accessibility: Ensure that the website is fully accessible to users with disabilities by following Web Content Accessibility Guidelines (WCAG) standards. This includes providing alternative text for images, captions for videos, and clear labeling for all interactive elements.

2. Improving the loading time of the home page.

3. Product Information Accuracy: Implement a verification process to regularly update product information, availability, and pricing to provide users with the most up-to-date information.

4. Search and Filtering Enhancements: Enhance filtering options to provide users with more refined search results based on criteria such as product specifications, safety standards, and certifications.

5. Conclusion

After conducting various tests on the "Worker" website, Most of them have a degree of severity between low and
Major. So, despite the relatively large amount of bugs, the website still functions Reasonably well and performs its main functions, However, I would like to draw attention to the bugs that were found that they be fixed to increase customer satisfaction and thereby increase sales volume. As a result, I recommend releasing the website.

6. Bug List
